

Hopper Spreader Door Kit

Poly Hopper Spreaders

INSTALLATION INSTRUCTIONS

⚠ WARNING

Do not exceed GVWR or GAWR ratings as found on the driver-side vehicle door cornerpost.

⚠ CAUTION

Read this document before installing the hopper spreader door kit.

⚠ CAUTION

Use standard methods and practices when attaching spreader and installing accessories, including proper personal protective safety equipment.

1. Park the vehicle on a smooth, level, hard surface, such as concrete. Turn the vehicle ignition to the "OFF" position and remove the key.
2. Align the hopper door hinges with the circular ears on the hopper.

3. Guide the three door hinges through the ears on the hopper, inserting the hinges as far as possible.

4. While holding the hopper door steady and in place, slide a washer over each door hinge. The washers are used to install the door and act as a guard to protect the hopper spreader from the drill bit used in Step 4.

5. Using a power drill and 3/8" bit, drill a hole down through each of the door hinges, ensuring that drilling creates a hole on the top, and a hole on the bottom of the hinge.

6. Insert a linchpin through the drilled hole. Ensure that the linchpin is flush and that the "tooth" side is on the top side of the door hinge.

Snap the ring down over the open end of the door hinge. Repeat for each of the hinges.

7. Repeat Steps 2–6 to install the other hopper door.
For further installation assistance, please contact your local authorized dealer.

The company reserves the right under its product improvement policy to change construction or design details and furnish equipment when so altered without reference to illustrations or specifications used. This equipment manufacturer or the vehicle manufacturer may require or recommend optional equipment for spreaders. Do not exceed vehicle ratings with a spreader. The company offers a limited warranty for all spreaders and accessories. See separately printed page for this important information.
