INSTALLATION INSTRUCTIONS

⚠ CAUTION

Read this document before installing the license plate light kit.

⚠ CAUTION

Use standard methods and practices when attaching spreader and installing accessories, including proper personal protective safety equipment.

Park the vehicle on a smooth, level, hard surface, such as concrete. Turn the vehicle ignition OFF and remove the key.

- Using the two #10 x 5/8" screws and #10 locknuts, fasten the license plate light to the steel license plate bracket.

- Using the two license plate screws, attach the license plate to the bracket and plate light.

- On the passenger's side of the spreader, locate the 3/8" or 1/2" hardware (depending on the spreader model) that matches the hole pattern on the license plate bracket assembly.
- Remove the nuts and washers, install the bracket, and reinstall the hardware.

Install the Harness

Route the license plate lamp electrical lead through a grommet on the electrical box.

Electrical Connections—Hopper-Side

1. Remove the electrical box cover.
2. Locate the 2-pin connector (brown and black wire) on the spinner harness. Unplug the connector from main harness and cut the brown wire 2" back from the connector. Strip the insulation so that approximately 1/4" of wire is exposed on the plug side only.
3. Locate the black and white leads from the license plate lamp. Strip the insulation so that approximately 1/4" of wire is exposed.
4. Crimp the supplied ring terminal to the black wire and cover it with heat shrink tubing.
5. Crimp the white wire from the plate light to the brown wire on the spinner harness using the supplied butt connector.
6. Connect the ring terminal to the NEGATIVE (-) side of the isolation block.
7. Reconnect the 2-pin connector of the spinner harness to the main harness.

Electrical Connections—Vehicle-Side

1. Locate a spot on the vehicle harness assembly approximately 20" up from the main molded connector.
2. At this spot open the convoluted tubing that covers the cable assembly and pull out the brown wire.
3. Splice this brown wire to the vehicle license plate lamp or park lamp circuit.
